

Thomas Miller

Senior Software Engineer

Platform Engineering | DevOps | Site Reliability | Secure Systems

wthomasmiii@gmail.com | (972) 795-9884 | millers.wiki

PROFESSIONAL SUMMARY

Platform-focused engineer with more than 10 years of experience building full-stack products and the systems that keep them reliable: cloud infrastructure, CI/CD, observability, identity and access management, scalable architecture, incident response, and technical leadership.

CORE EXPERTISE

Languages: HTML, CSS, Sass, Less, JavaScript, TypeScript, Java, Go, Python, C#

Web Development: React, Next.js, Tailwind CSS, Bootstrap, Context API, Redux, Zustand, Jest, Vite, Selenium, Storybook

API Development: Node.js, Express, Fiber, Gin, Django, Spring Boot, GraphQL, Headless CMS

App Development: Flutter, Ionic, .NET, React Native, Three.js, Unity, Unreal Engine

Infrastructure: AWS, Docker, Docker Swarm, Kubernetes, Serverless, Terraform, Layer 4 and 7 Networking, HAProxy, NGINX, Load Balancing

Security, Authentication, and Authorization: IAM, JWT, Session Management, Cookies, CORS, CSRF, RBAC, PBAC, Keycloak, Okta, Active Directory, LDAP

DevOps: CI/CD, GitOps, Git, GitHub, GitLab, ECR, Artifactory, Docker Hub, GitHub Actions, GitLab CI/CD, Jenkins, CircleCI, Fleet, Helm, Prometheus, Grafana, ELK, Datadog, Splunk

Site Reliability Engineering: High Availability, Latency Optimization, Auto Scaling, Monitoring, Incident Response, Post-Incident Review

Testing: Unit Testing, Integration Testing, End-to-End Testing, Performance Testing, Security Testing

Data and Databases: Data Modeling, Normalization, ER Diagrams, Data Integrity, PostgreSQL, MySQL, MongoDB, DynamoDB, Cassandra, Redis, RabbitMQ, Kafka

Software Architecture: Monoliths, Microservices, Domain-Driven Design, Test-Driven Development, Event-Driven Architecture, System Design

Technical Documentation: API Documentation, Code Documentation, Architecture, Requirements, System Design, Deployment, User Manuals, Swagger, Postman, UML, Lucidchart, Docusaurus

Project Management: Agile, Scrum, Cross-Functional Collaboration, Mentoring

SELECTED PORTFOLIO

EazyHQ

Active development

Lead Software Engineer | June 2026 A modular workspace operating system for projects, data, automation, content, and team workflows. **Technologies:** Flutter, Dart, Go, PostgreSQL, Redis, Docker, GitHub Actions, Caddy

- Designed a registry-first add-on architecture with build-time linking and workspace-level enablement.
- Built event-driven automation infrastructure covering subscriptions, queued steps, waits, execution logs, and run histories.
- Developed workspace dashboards with configurable tabs, permission-aware editing, and add-on-provided widgets.
- Implemented platform capabilities for forms, structured data, APIs, sites, email, calendars, storage, reports, directories, and wikis.
- Created a cross-platform Flutter interface backed by a Go service layer, PostgreSQL, Redis, and containerized deployment.
- Established GitHub Actions and Docker-based delivery workflows for the API and web application.

PROFESSIONAL EXPERIENCE

BAAS Software

June 2022 - Present

Senior Software Engineer

Remote

- **DevOps and site reliability:** Collaborated with DevOps and SRE teams to improve deployment pipelines, reliability, and downtime, helping achieve 99.9% uptime and reduce release times by 40%.
- **CI/CD automation:** Implemented GitHub Actions pipelines that streamlined software delivery and reduced deployment time and update-related downtime.
- **Observability:** Improved monitoring and incident response with Prometheus, Grafana, and Kibana.
- **AWS optimization:** Improved application performance and deployment efficiency while reducing infrastructure costs.
- **Security and compliance:** Implemented custom AWS IAM policies that removed unauthorized-access vulnerabilities and supported a 100% security-audit compliance rate.
- **Identity systems:** Delivered SSO for a Web3 mobile crypto wallet and implemented 2FA, OAuth 2.0, temporary codes, magic links, and SSO across other applications.

USAA

June 2020 - July 2022

Software Engineer III

Remote

- **Quality engineering leadership:** Elected Vice President of the Quality Engineering Society and helped introduce comprehensive testing practices that supported consistent delivery of high-quality software.
- **DevOps adoption:** Automated deployment pipelines, streamlined development workflows, and improved system monitoring to increase stability and reduce downtime.
- **Proactive SRE:** Partnered with cross-functional teams to analyze performance, address vulnerabilities, and prevent failures.
- **Monitoring and incident response:** Deployed real-time monitoring and alerting, led post-incident reviews, and drove long-term reliability improvements.
- **Mentorship:** Guided junior engineers in SRE and quality practices.
- **Scalable architecture:** Contributed to robust systems aligned with SRE practices and designed for growth under demand.

Web Plant Media

July 2018 - May 2020

Software Engineer

Remote

- **AWS migration:** Migrated client websites to AWS, improving load time, reliability, security, and long-term scalability while reducing hosting costs.
- **Monitoring and logging:** Introduced real-time performance monitoring, alerting, and actionable logging for faster issue detection and data-informed improvements.
- **Disaster recovery:** Developed and tested recovery plans to minimize downtime and protect client operations.
- **Client delivery:** Maintained clear communication across projects and delivered tailored solutions for unique requirements.
- **Performance and security:** Improved website speed, SEO, and data protection across client sites.

Caprock Custom Apps

February 2017 - July 2018

Software Engineer

- **Requirements and planning:** Worked with cross-functional teams to define requirements and prepare custom solution plans tied to business value.
- **Backend performance:** Optimized Node.js and Express services, reducing response times by up to 30% for key features.
- **Full development lifecycle:** Contributed from discovery through delivery for scalable applications that met client deadlines.
- **Maintainability:** Applied scalable codebase practices that reduced technical debt and debugging time.
- **Mobile delivery:** Released multiple mobile applications through app stores and provided post-launch technical support.

IT Help Central

November 2015 - August 2017

IT Support Technician / Supervisor

- **Technical support:** Resolved software and hardware issues for students, faculty, and staff through walk-up, phone, and on-site channels.
- **Knowledge management:** Created and maintained troubleshooting content used by thousands of Texas Tech University users.
- **Team leadership:** Earned promotion to Lead Technician, assumed additional operational responsibilities, and led projects.
- **Customer communication:** Translated technical information for people with varied levels of expertise.
- **Problem solving:** Diagnosed root causes and collaborated with other IT staff to resolve complex issues efficiently.

LEADERSHIP

Vice President, Quality Engineering Society, USAA

November 2020 - July 2022

Elected to help advance quality engineering practices, testing frameworks, mentorship, and operational excellence.
